

# Materials Standards for Metal Injection Molded Parts\*

## Table of Contents—2007 Edition

<b>EXPLANATORY NOTES AND DEFINITIONS</b>	
Minimum Value Concept	3
Minimum Mechanical Property Values	3
Minimum Magnetic Property Values	3
Minimum Controlled-Expansion Property Values	3
Practical Methods of Demonstrating	
Part Performance	3
Typical Values	4
Chemical Composition	4
Mechanical Properties	4
Heat Treatment	4
Surface Finish	4
Microstructure	4
MIM Material Designation	4
Material Selection	4
Grade Selection	5
Density	5
Ultimate Tensile Strength	5
Yield Strength	5
Elongation	6
Elastic Constants	6
Young's Modulus (E)	6
Shear Modulus (G)	6
Poisson's Ratio ( $\nu$ )	6
Impact Energy	6
Macrohardness (Apparent)	6
Microindentation Hardness	6
Corrosion Resistance	6
Sulfuric Acid Testing	6
Copper Sulfate Testing	7
Boiling Water Testing	7
Soft Magnetic Properties	7
Magnetizing Field (H)	7
Induction (B)	7
Maximum Induction ( $B_m$ )	7
Maximum Permeability ( $\mu_{max}$ )	7
Coercive Field ( $H_c$ )	7
Residual Induction ( $B_r$ )	7
Controlled-Expansion Alloys/Coefficient of Thermal Expansion (CTE)	7
SI Units	7
Comparable Standard	7
<b>DATA TABLES – INCH-POUND UNITS</b>	
Low-Alloy Steels	8-9
Stainless Steels	10-11
Soft-Magnetic Alloys	12-13
Controlled-Expansion Alloys	14-15
<b>DATA TABLES – SI UNITS</b>	
Low-Alloy Steels	16-17
Stainless Steels	18-19
Soft-Magnetic Alloys	20-21
Controlled-Expansion Alloys	22-23
SI Units Conversion Table	
Quantities/Terms Used in MPIF Standards	24
Index	
Alphabetical Listing & Guide to Material Systems & Designation Codes Used in MPIF Standard 35	25
Standards Availability/MPIF Standing Order Form	29
