GENERAL INFORMATION SECTIONS

Table of Contents.....	I
Test Methods Standards - Classification	II
Subject (Key Word) Index.....	III
Sources of Specialized Equipment.....	IV
SI Units - Conversion Table	V

STANDARD TITLE, ISSUE/REVISION DATE	STANDARD NUMBER
-------------------------------------	-----------------

* *Indicates Revised or Reaffirmed Standard - This Edition*

** *Indicates New Standard & Precision Statement - This Edition*

Sampling Metal Powders (05)	01
Loss of Mass in a Reducing Atmosphere for Metal Powders (Hydrogen Loss), Determination of (05)	02
Flow Rate of Free-Flowing Metal Powders Using the Hall Apparatus, Determination of (04)	03
Apparent Density of Free-Flowing Metal Powders Using the Hall Apparatus, Determination of (09)	04*
Sieve Analysis of Metal Powders, Determination of (09)	05*
Acid Insoluble Matter in Iron and Copper Powders, Determination of (04).....	06
Terms Used in Powder Metallurgy, Definition of (99)	09
Tensile Properties of Powder Metallurgy (PM) Materials, Determination of (08)	10*
Green Strength of Unsintered Compacted Powder Metallurgy, Materials, Determination of (08†)	15
Apparent Density of Non-Free-Flowing Metal Powders Using the Carney Apparatus, Determination of (04)	28
Terms for Metal Powder Compacting Presses & Tooling, Definition of (92).....	31
Average Particle Size of Metal Powders Using the Fisher Subsieve Sizer, Determination of (05)	32
Properties of Sintered Bronze PM Filter Powders, Determination of (05)	39
Impact Energy of Unnotched Powder Metallurgy (PM) Test Specimens, Determination of (09).....	40*
Transverse Rupture Strength of Powder Metallurgy (PM) Materials, Determination of (08).....	41
Density of Compacted or Sintered Powder Metallurgy (PM) Products, Determination of (08)	42*
Apparent Hardness of Powder Metallurgy Products, Determination of (05)	43
Dimensional Change from Die Size of Sintered Powder Metallurgy Specimens, Determination of (04)	44
Compressibility of Metal Powders, Determination of (05)	45
Tap Density of Metal Powders, Determination of (04).....	46
Apparent Density of Metal Powders Using the Arnold Meter, Determination of (05).....	48
Copper-Base Infiltrating Powders, Testing (05)	49
Preparing and Evaluating Metal Injection Molded (MIM) Sintered/Heat Treated Tension Test Specimens, Methods for (08)	50*
Microindentation Hardness of Powder Metallurgy Materials, Determination of (05)	51
Effective Case Depth of Ferrous Powder Metallurgy Products, Determination of (05)	52
Measuring the Volume of the Apparent Density Cup Used with the Hall or Carney Apparatus (Standards 04 and 28), Method for (05)	53
Density of Impermeable Powder Metallurgy (PM) Materials, Determination of (06).....	54

STANDARD TITLE, ISSUE/REVISION DATE

STANDARD
NUMBER

* *Indicates Revised or Reaffirmed Standard - This Edition*

** *Indicates New Standard – This Edition*

Radial Crush Strength (K) of Powder Metallurgy (PM) Test Specimens, Determination of (07).....	55
Rotating Beam Fatigue Endurance Limit of Powder Metallurgy (PM) Materials, Determination of (07)	56
Oil Content, Interconnected Porosity and Oil-Impregnated Efficiency of Sintered Powder Metallurgy (PM) Products, Determination of (09)	57*
Surface Finish of Powder Metallurgy (PM) Products, Determination of (08)	58
Charpy Impact Energy of Unnotched Metal Injection Molded (MIM) Test Specimens, Determination of (08)	59*
Uniaxially Compacted Powder Metallurgy (PM) Test Specimens, Preparation of (08)	60
Compressive Yield Strength of Powder Metallurgy Materials, Determination of (07).....	61
Corrosion Resistance of MIM Grades of Stainless Steel Immersed in 2% Sulfuric Acid Solution, Determination of (09)	62*
Density Determination of Metal Injection Molded (MIM) Components (Gas Pycnometer) (08).....	63*
Terms Used in Metal Injection Molding (MIM), Definition of (07)	64
Sample Preparation and Determination of the Hardenability of PM Steels (Jominy End-Quench Hardenability), Method of (07)	65
Sample Preparation for the Determination of the Total Carbon Content of Powder Metallurgy (PM) Materials (Excluding Cemented Carbides), Method for (08).....	66**
