

5-year Index

International Journal of Powder Metallurgy & Powder Technology

This 5-year index of the 142 articles published in the Journal from 1980–1984 provides a useful review of worldwide P/M developments and trends. The index includes subjects and authors. Article numbers are on the left and page numbers on the right.

Article Index

Article No.	Title	Authors	Page No.
Volume 16, No. 1, January 1980			
386	The Cold Welding of Powders by Dynamic Compaction	D. Raybould	9
387	Backward Cold Extrusion of P/M Composite Materials	H. Hassler H. Schreiner	21
388	Properties of Extruded Metal Powders	G. Friedman	29
389	A Laboratory/Production Comparison: Powder Compacting and Ejection Response	M. J. Koczak J. F. McGraw	37
390	Effect of Nickel on the Sintering of Iron Containing Phosphorus	M. Hamiuddin G. Upadhyaya	57
391	Transformation Characteristics of P/M Low Alloy Steels Prepared from a Partially Pre-Alloyed Powder	J. Tunstall R. Haynes	69
Volume 16, No. 2, April 1980			
392	Mixing and Compaction Behavior of Ferrous Powders	A. Kao M. J. Koczak	105
393	The Importance of Powder Particle Size and Flow Behavior in the Production of P/M Parts for Soft Magnetic Applications	M. H. Kahn	123
394	Properties of Fe-50 w/o Ni Alloys Prepared by Direct Hydrogen Reduction of Mixed Oxide Preforms	M. L. Green H. Herring, III R. C. Sherwood M. Robbins V. G. Lambrecht, Jr.	131

Article No.	Title	Authors	Page No.
395	A Compression Test to Determine the Coefficient of Friction in Forging P/M Preforms	T. Tabata S. Masaki K. Hosokawa	149
Volume 16, No. 3, July 1980			
396	The Powder Metallurgy Industry in the United Kingdom	D. A. Barrow	231
397	Present Status of Powder Metallurgy in West Germany	W. J. Huppmann	237
398	Present Status of Powder Metallurgy in France	A. Accary	243
399	Present Status of Powder Metallurgy in Japan	T. Watanabe	249
400	Sintering of Inconel 718	K. Hajmrle R. Angers	255
401	Influence of the Rotary Motion of a Die on Friction During the Compaction of Iron Powder	J. Duszczyk J. Lemanowicz	269
402	7th International Powder Technology & Bulk Solids Exhibition & Powder Workshop	H. Hausner	283
Volume 16, No. 4, October 1980			
403	Powder Metallurgy—The Technology for the New Decade	K. H. Roll	345
404	Fabrication of Powders by the Rotating Electrode Process	B. Champagne R. Angers	359
405	Manganese Sublimation and Carbon Ferromanganese Liquid Phase Formation During Sintering of Premixed Manganese Steels	A. Salak	369
406	Outstanding P/M Parts Recognized in International Design Competition	P. K. Johnson	381
407	Pore Morphology of Ferrous Metal Powders Sintered at High Temperatures	S. MocarSKI D. W. Hall	387
408	Sixth Annual P/M Conference in India	H. H. Hausner	406
409	1980 Powder & Bulk Solids Conference & Exhibition	H. H. Hausner	407
410	1980 International P/M Conference & Exhibition	H. H. Hausner	408
Volume 17, No. 1, January 1981			
411	The Cogent Program and the Role of Universities	J. R. Heizer	9
412	Effect of Die Rotary Motion on Properties of P/M Iron Sleeves	J. Duszczyk J. Lemanowicz	17

Article No.	Title	Authors	Page No.
413	How Porosity and Atmosphere Effect the Thermal Conductivity of P/M Parts	P. Howard M. J. Koczak	25
414	Relationship Between Transverse Rupture Strength and Hardness of P/M Fe-Cu Alloys	V. B. Phadke	37
415	Calculating the Unit Cost of P/M Parts by Computer	M. H. Khan	45
Volume 17, No. 2, April 1981			
416	Five Decades of Iron Powder Production	S. I. Hulthen	81
417	Resistance Sintering with Alumina Dies	G. A. Weissler	107
418	Sintered 50 Fe/50 Ni Magnetic Materials	J. Kaczmar B. Weglinski	119
419	Closure of Isolated Pores in Liquid Phase Sintering of W-Ni	O-J. Kown D. N. Yoon	127
420	Relationship Between Mechanical Properties and Particle Size of Iron Powder Compacts	M. V. Veidis K. R. Geiling	135
421	MPR Conference on P/M Superalloys	A. G. Dowson	145
422	P/M Materials for Magnetic & Electrical Applications	H. H. Hausner	146
Volume 17, No. 3, July 1981			
423	Current and Future Tungsten Supplies	C. C. Clark J. B. Sutliff	185
424	Powder Metallurgy of Refractory Metals and Applications	R. Eck	201
425	Disintegration of Liquid Metals by Low Pressure Water Blasting	B. Heshmatpour G. Copeland	213
426	Influence of Rate of Testing on Radial Crushing Strength of P/M Bearings	A. Bost P. G. Mukunda	223
427	Hot Extrusion of Aluminum Powder at Low Reduction Ratios	A. Kumar P. J. Jain M. L. Mehta P.N. Godbole	237
428	10th Plansee Seminar	H. H. Hausner P. K. Johnson	257
429	1981 National P/M Conference	J. M. Capus	263
430	Grain Boundary Cavitation in Metals & Alloys	H. H. Hausner	265

Article No.	Title	Authors	Page No.
Volume 17, No. 4, October 1981			
431	A Hardenable P/M Steel Through Infiltration	W. Rostoker D. R. Clemens	277
432	Determination of the Optimal Rotational Speed for Powder Mixing	J. Sundrica	291
433	Properties of Sintered and Infiltrated Tungsten-Copper Electrical Contact Material	K. V. Sebastian	297
434	Effect of Titanium Supersaturation on the Ductility of A Rapidly Solidified Powder-Processed Maraging Steel	J. E. Smugeresky R. M. German	305
435	Rapid Solidification Technology	T. A. Gaspar	319
436	Outstanding Applications of Powder Metallurgy Recognized	P. K. Johnson	323
437	60th Anniversary of Metallwerk Plansee	R. Palme W. Aschenbrenner	331
Volume 18, No. 1, January 1982			
438	Improvement of Steel Properties Using Fine-Grain Structure Hametag Iron Powder	A. Salak	11
439	Effect of Production Engineering Parameters on the Magnetic Properties and Structure of Iron-Silicon P/M Materials	J. Kaczmar B. Weglinski	25
440	Introduction to Protective Surfacing	E. N. Aqua	37
441	Mining Applications of Thermal Sprayed Coatings	C. M. Perrott	39
442	Applications of Nickel/Chromium/Boron/Silicon and Nickel/Boron/Silicon Alloys in the Glassware Industry	H. T. Steine W. Simm	57
443	New Powder Developments for Non-Transferred Plasma Arc Spraying	D. L. Houck	69
444	Coatings Produced Under Protective Cover Vacuum Plasma Deposition	F. J. Hermanek	81
445	Fifth International Round Table Conference on Sintering	R. M. German	89
446	Seventh International P/M Conference	F. V. Lenel	91
Volume 18, No. 2, April 1982			
447	Universal Characterization of Powders by Powder Index	M. H. Kahn	105

Article No.	Title	Authors	Page No.
448	Origins of Green Strength in Iron P/M Compacts	J. A. Lund	117
449	Mechanical Behavior of Powders During Compaction in a Mold with Various Cross Sections	Y. Morimoto T. Hayashi T. Takei	129
450	Sintering Molybdenum Treated with Ni, Pd and Pt	R. M. German C. A. Labombard	147
451	Powder Metallurgy in the People's Republic of China	F. V. Lenel	157
452	International Symposium on Powder Technology, 1981	J. K. Beddow	169
Volume 18, No. 3, July 1982			
453	Bulk Microcrystalline Alloys From Metallic Glass Powder	R. Ray	209
454	Rheology of Solid-Liquid P/M Astroloy—Application of Supersolidus Hot Pressing of P/M Superalloys	M. Jeandin J. L. Koutny Y. Bienvenu	217
455	Effect of Notch Acuity on the Fatigue Behavior of X7091 Aluminum	J. S. Santner	225
456	The Effect of Mean WC-Grain Size on Mechanical Properties and Cutting Performance of Cemented Carbides	L. Zima	233
457	Optimum Zirconium and Boron Powder Characteristics for Solid Rocket Propellant Applications	R. J. Markle S. G. Stephenson	243
458	Conference on Productivity & Powder Metallurgy	J. M. Capus	259
459	AIME Annual Meeting	H. H. Hausner	261
Volume 18, No. 4, October 1982			
460	The State-of-the-P/M Industry—1982 and Beyond	K. H. Roll	291
461	Characteristics of Tin Powder Produced by an Annular Gas Atomization Nozzle	P. E. Hugo R. M. German	301
462	The Influence of MoC and NbC Additions on Microstructure and Mechanical Properties of TiC Based Cemented Carbides	M. Komac D. Lange	313
463	Welding Powder Metallurgy Parts	C. E. Witherell	323
464	The Powder Metallurgy Industry in Canada	J. M. Capus W. F. Fossen	335
465	Present Status of Powder Metallurgy in Turkey	E. M. Uygur	347
466	P/M Replaces Components Made by Investment Casting, Machining and Stamping	P. K. Johnson	355

Article No.	Title	Authors	Page No.
467	P/M '82 in Europe International P/M Conference	P. K. Johnson	365
468	1982 National P/M Conference	K. E. Meiners	369
469	Indian National P/M Conference—1982	N. T. George	373
Volume 19, No. 1, January 1983			
470	Surface Analysis of Steel Powders by ESCA	D. P. Ferriss	11
471	Cold Formability of Billets by Loose Powder Sintering	S. D. El-Wakil H. Khalifa	21
472	Combined Mechanical Activation and Sintering with a Short-time Occurrence of a Liquid Phase	B. Rieger W. Schatt Ch. Sauer	29
473	Repressing of Sintered Iron Compacts	N. K. Rizk	43
474	Modulus of Rupture of Low Alloy Powder Metallurgy Nickel Steels	S. Jaiswal A. J. Fletcher R. T. Cundill	51
475	Powder Metallurgy Group, 25th Anniversary Meeting	I. Jenkins	71
Volume 19, No. 2, April 1983			
476	A Dimensionless Correlation for Transverse Atomization	N. Nagarjuna A. Mukherjee P. G. Mukunda	91
477	Aluminum-Nickel Composite Powders by Electroless Nickel Plating	R. Narayan R. Arghode	101
478	The Impact of System Design on Metal Powder Production Costs	J. J. Dunkley	107
479	Telephone Tokens Produced by Powder Metallurgy	A. Sharon	121
480	Fatigue Crack Propagation Rates in a Sintered Aluminum Alloy Powder	P. DiMascio R. A. Queency	127
481	Powder Metallurgy and Space Manufacturing	D. R. Criswell	137
Volume 19, No. 3, July 1983			
482	A New Look at Flow Behavior of Metal Powders	A. Gallo F. Bocchini	169
483	Particle Enhanced Electroless Coatings	D. J. Kenton	185
484	Precipitation Hardening of Powder Metallurgy Aluminum-Copper Alloys	B. L. Davies F. Farzin-Nia	197

Article No.	Title	Authors	Page No.
485	The Mechanical Properties of RSR Processed Fe-Si-Al Alloys	S. Thamboo G. W. Powell J. P. Hirth	211
486	Present Status of Powder Metallurgy in Italy	G. Silva	223
487	Powder Metallurgy at the TMS-AIME Conference	H. H. Hausner	227

Volume 19, No. 4, October 1983

488	State of the Powder Metallurgy Industry and a Marketing Plan for the 80's	K. H. Roll	249
489	Vacuum Degassing of Metal Powders	P. Fle R. Ruthardt	259
490	Powder Particle Boundary in Sintered Iron	H. Kuroki T. Honda	269
491	Diffusional Activated Sintering-Densification, Microstructure and Mechanical Properties	R. M. German	277
492	Sintering of 434L Ferritic Stainless Steel Containing Al ₂ O ₃ Particles	S. K. Mukherjee G. S. Upadhyaya	289
493	High Density Tungsten-Silver Powder Metallurgy Materials	S. Stolarz J. Kurzejz K. Wojtasik	299
494	Electroless Nickel Coating on Powder Metallurgy Iron Parts	P. Molera J. A. Ortega	305
495	Award Winning Parts Show Powder Metallurgy's Precision and Cost Savings	P. K. Johnson	309
496	Powder and Bulk Solids Conference and Exhibition	H. H. Hausner	314

Volume 20, No. 1, January 1984

497	Densification of Green Compacts by Extrusion at Low Pressure	T. Tabata S. Masaki S. Shima	9
498	Activated Sintering of Molybdenum Powder Electroless Plated with a Nickel-Phosphorus Alloy	Y. Bin F. V. Lenel	15
499	Relationship Between Process Variables and Density of Explosively Compacted Iron Powder	K. S. Baird J. D. Williams	23
500	Fracture Toughness of Powder Metallurgy Steels	E. Navara B. Bengtsson	33
501	Influence of Homogeneity on the Fatigue Properties of Sintered Steels	C. M. Sonsino G. Schlieper W. J. Huppmann	45

Article No.	Title	Authors	Page No.
502	The Modulus of Rupture of Nickel Steels Slowly Cooled from the Sintering Temperature	L. Cifuentes A. J. Fletcher	51
503	Metals Congress 1983 in Philadelphia Sessions on Powder Metallurgy of Aluminum	K. H. Moyer	73
Volume 20, No. 2, April 1984			
504	Production and Properties of Electrolytic Copper Powder	E. Peissker	87
505	Double Action Compaction Under Industrial Conditions	J. Duszczyk	103
506	Dynamic Compaction and the Effect of Air Contained Within Powder Pores	Y. Sano K. Miyagi	115
507	Hot Consolidation of Porous Preforms Using "Soft" Tooling	B. Ferguson A. Kuhn O. D. Smith F. Hofstatter	131
508	Yielding in Sintered Iron and Iron-Phosphorous Compacts	J. A. Lund	141
509	Enhanced Sintering of Tungsten-Phase Equilibria Effects on Properties	C-J. Li R. M. German	149
510	The Influence of Abnormal Brittleness on the Impact Properties of Sintered Iron	H. Kuroki Y. Tokunaga	163
Volume 20, No. 3, July 1984			
511	Progress of Powder Metallurgy in North America	K. H. Roll P. K. Johnson	185
512	Powder Metallurgy in the Federal Republic of Germany	F. Thummler R. Oberacker	193
513	Present Status of Powder Metallurgy in France	M. Eudier	205
514	Powder Metallurgy in Scandinavia	P. G. Arbstedt	209
515	Present Status of Powder Metallurgy in India	P. Ramakrishnan	219
516	Present Status of Powder Metallurgy in Japan	T. Watanabe T. Sakurai	225
517	Present Status of Powder Metallurgy in Korea	K. Y. Eun D. N. Yoon	231
518	Looking Ahead to 1995—The Future of Powder Metallurgy	W. J. Huppmann	241
519	Innovations in Sintering	R. M. German	255
520	Third International School on Sintering Materials	V. K. Sarin	267

Article No.	Title	Authors	Page No.
Volume 20, No. 4, October 1984			
521	Pressing and Sintering of Nickel Powders	V. A. Tracey	281
522	Sintering Behavior, Mechanical and Magnetic Properties of Sintered Fe-Si Materials	G. Jangg, M. Drozda H. Danninger H. Wibbeler W. Schatt	287
523	Dimensional Changes During Transient Liquid Phase Sintering of Fe-Ni	H. Puckert W. A. Kaysser G. Petzow	301
524	Improving Properties of P/M Through Liquid Phase Sintering	M. R. Pickus	311
525	Mechanism of Capillary-Force Induced Filtration of Iron Skeletons with Cast Iron	S. Banerjee R. Oberacker C. G. Goetzel	325
526	Increasing Mechanical Properties of Steels Containing Transition Metal Carbides Master Alloy MCM and Phosphorus	M. Hamiuddin	343
527	Powder Metallurgy Design Competition Awards	P. K. Johnson	351
528	1984 International P/M Conference & Exhibition	H. H. Hausner	361
