Metal Additive Manufacturing Conference Issues Call for Presentations

An official call for presentations has been announced for AMPM2018: Additive Manufacturing with Powder Metallurgy, June 17–20, 2018. This leading North American metal additive manufacturing (AM) conference will take place at the Grand Hyatt San Antonio, Texas, and will feature top industry experts in this fast-growing field.

Submission categories include the following:

- Materials
- Applications
- Technical barriers
- Process economics
- New developments

"Metal AM is still expanding exponentially," explains Jim Adams, executive director/CEO, Metal Powder Industries Federation (MPIO). "Due to increased conference participation over the last several years, we've decided to extend the technical sessions at AMPM2018 to three days. Speakers will have more time to explain their research, and attendees will have even more opportunities to learn and grow."

Submissions will be accepted through November 3, 2017. Visit ampm2018.org for details.

The conference is sponsored by the Metal Powder Industries Federation, the North American trade association representing the powder metallurgy industry, and its affiliate APMI International.

About the Metal Powder Industries Federation

Metal Powder Industries Federation is the North American trade association formed by the powder metallurgy industry to advance the interests of the metal powder producing and consuming industries and provides a single point of reference for all MPIO member companies.

About APMI International

APMI International is a non-profit professional society which promotes the advancement of powder metallurgy and particulate materials as a science. Its purpose is to disseminate and exchange information about PM and particulate materials through publications, conferences, and other activities of the society.
